## Drawing with Scratch

### Directions:

1. Working with a partner or on your own, create new Scratch project and make the shapes listed below.
2. Begin each new shape with a different event. For example: the large square may begin when the letter "a" is pressed and the rectangle may begin when the letter "b" is pressed.
3. You may want to keep notes because you may use the same scripts more than once.
4. The first shape is listed to get you started.

Task	
1	Draw a square
2	Draw a bigger square
3	Draw a rectangle
4	Draw a bigger rectangle
5	Draw a circle
6	Draw a bigger circle
7	Draw a triangle
8	Draw a bigger triangle
9	Draw a square to the right or left of a triangle
10	Draw a small rectangle next to a big square.
11	Draw a triangle on top of a square.
